

Appdome for Mattermost

Mattermost joins Appdome's App Publishers Service to make mobile integrations easier and seamless for customers.

ABOUT APPDOME

Today, it's very common for employees to introduce new apps into the workplace. Whenever they find great productivity, collaboration or communication apps, they will readily share them with their co-workers. Before you know it, these apps emerge as central parts of a new, organic and more efficient workflow inside the organization.

From the start, enterprises do not have control over the apps that employees bring into the workplace. Connecting an app to a mobility management solution means an enterprise has to get an app publisher to work together with an EMM vendor. Typically, an app publisher has to develop a specific EMM compatible version of the app to make it "talk" to the EMM System.

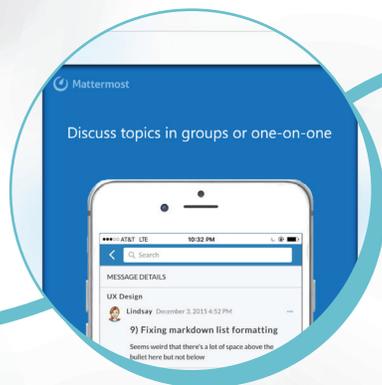

Appdome's App Publishers Service eliminates the challenges of integrating mobile SDKs to apps. Once a mobile app is listed in the App Publishers Service, enterprises can easily complete "one-click" integrations and combine the mobile apps with EMM functionality as needed.

Mattermost®

Mattermost is a workplace messaging platform for the web, PCs, and phones. Mattermost provides:

- **Messaging that works**
Effective workplace messaging search and integrations, plus the web, mobile and PC apps and much more.
- **Open source and private cloud-ready implementations**
Modern communication behind your firewall. MIT license with hundreds of contributors.
- **An alternative to Slack**
Enjoy a superset of Slack's popular features, including Slack-compatible webhooks plus import of Slack channels, users, and even theme colors.

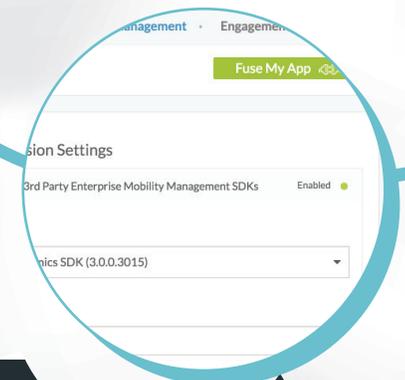

1. UPLOAD THE APP

2. CHOOSE THE SDK

3. FUSE ON APPDOME

IT'S THAT SIMPLE!

Appdome accelerates time-to-value by automating the integration of Mattermost mobile applications into leading Enterprise Mobility Management solutions, including AirWatch, BlackBerry and Synchronoss. Customers gain significant advantages using the Appdome platform to integrate Mattermost:

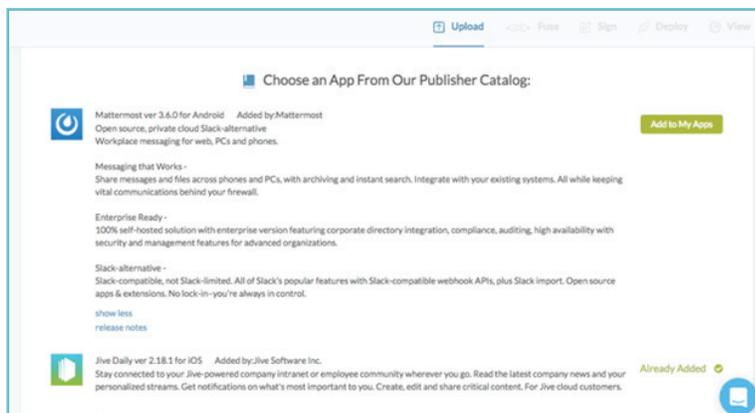

- **Speed:** On the Appdome platform, customers integrate (“Fuse”) mobile SDKs (like EMM SDKs) to Mattermost in seconds, not weeks or months required by regular IDE and development processes.
- **No Coding:** The entire integration process is completely codeless, so no code or coding is required to complete full implementations of mobile service SDKs.
- **Integrations by anyone:** Anyone can complete mobile integrations on Appdome. The interface is intuitive, easy to use and there is no need for dedicated engineering resources to implement mobile SDKs.
- **More apps, more frameworks:** Appdome supports all current versions of iOS or Android as well as all app frameworks (Cordova, Ionic, Phonegap, Xamarin, SAP Fiori, etc.).
- **Implement leading SDKs:** Appdome supports a growing list of EMM and other mobile service SDKs, including BlackBerry, Airwatch, Synchronoss, Citrix and others coming soon.
- **Stateful Platform to complete work:** Appdome saves and stores mobile integration projects so customers can return and reuse/update their work again and again with each release.
- **Verified implementations you can trust:** Appdome verifies each “Fusion” scenario against the SDKs available on its platform to ensure a consistent and repeatable integration each time you click "Fuse my App".

Deliver your Mattermost’s app, without additional development effort, time, testing and other resources intensive initiatives with Appdome!

HOW TO FIND THE MATTERMOST APP

To find the Mattermost app on the Appdome platform, simply click “Add App” and select Mattermost from Appdome’s App Catalog.

With just a few quick and straightforward clicks, your customers can integrate, test and deploy Mattermost - tailored to the enterprise requirements they need.

About Appdome

Appdome is a mobile productivity platform that enables the rapid integration of mobile SDKs and features to apps. Using Appdome shortens the time to deliver integrated service to apps, allowing mobile developers and professionals to integrate services to apps on demand. With an easy to use mobile integration workflow, Appdome's cloud service allows users to perform integration projects in minutes. No code, coding or development expertise is required. To make Appdome work, no modifications to an app or an SDK are required. Appdome is currently used by the world’s leading financial, healthcare and e-commerce companies to support mobile productivity, compliance and security for consumers and employees. Appdome was rated a Cool Vendor in Mobile Security by Gartner in 2015. For more information, visit www.appdome.com.
